

## NEW - EDGE ROLLER

ISC NOW OFFERS AN EDGE-ROLLER SYSTEM TO PROTECT ROPES FROM DAMAGE WHEN WORKING OVER SHARP EDGES. THE SYSTEM IS A FULLY MODULAR, CONSISTING OF EDGE-ROLLER BOXES MADE FROM PRESSED AND POWDER COATED ALUMINIUM AND STEEL OVAL QUICK-LINKS, WHICH CAN BE EASILY AND QUICKLY LINKED TOGETHER TO FORM A CHAIN OF WHATEVER LENGTH IS APPROPRIATE FOR THE TASK. EACH BOX ASSEMBLY (CONSISTING OF ONE BOX AND TWO QUICK-LINKS) WEIGHS 460G/1LB. EACH BOX HAS A SERIES OF ROLLERS WHICH PROTECT ROPES IN 3 DIRECTIONS BUT ALLOW THE ROPE TO RUN SMOOTHLY WITH MINIMAL FRICTION.

THE EDGE ROLLER SYSTEM CAN BE CONNECTED TO A HAND ASCENDER OR OTHER CAMMING DEVICE WHICH WILL JAM ON THE ROPE NEAR TO THE ANCHOR. THIS PREVENTS THE BOXES FROM COMING LOOSE OR SLIDING OVER THE EDGE.
