D4™ upgrades to a MK2 version

D4

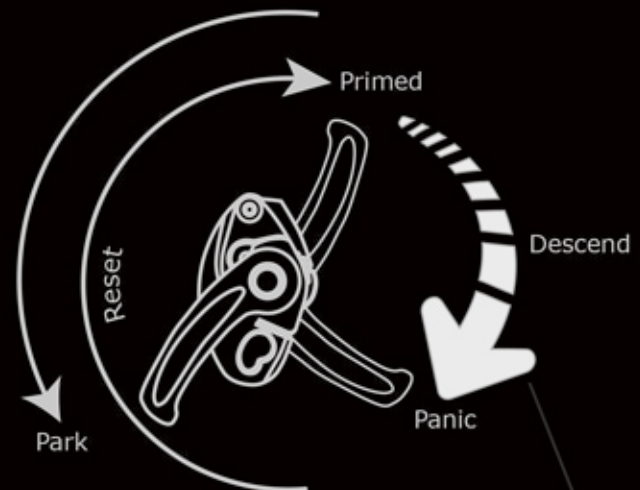

ESCENDER

climb.
work.
rescue.

- The new shape, longer handle provides improved grip and comfort and offers increased leverage for improved control of loads
- The handle position has been adjusted by 30°, to offer improved ergonomic handling and control
- The new handle is Forged from Aluminium and Hard Anodised, to improve strength and wear resistance
- The top bobbin is now made from a harder grade Stainless Steel, for improved wear resistance
- New, more comprehensive User Instruction Manual, detailing a multitude of uses
- The MK2 device and User Instruction Manual have been improved in line with feedback from numerous industry groups

ANSI Z359.4:2013, EN12841:2006, NFPA 1983:2012
