

RP282 Phlotich™ Pulley

Data Sheet

PHLOTICH™

climb. work. rescue.

I|S|C

Solutions in Metal

The Phlotich™ is a multi-aperture device, which has been specifically designed for use in SRT & DdRT applications.

The Kidney-shaped aperture will allow a Karabiner to be fully rotated and is shaped to reduce the risk of side loading. The Kidney-shaped aperture will accept two simultaneous Karabiner attachments.

The Phlotich™ is available with Bushing or Bearing and comes in a range of colours.

Colour Options:

Gold, Orange, Red, Purple, Grey, Black
