

BU182 Klick-Lock Buckle & Sliding Tang Set

Data Sheet

climb. work. rescue.

ISC

SOLUTIONS IN METAL

ISC manufacture a range of Buckles and fittings, so suit 25mm or 45mm webbing widths.

ISC Klick-lock Buckles can only be opened when both of the release buttons are fully depressed. This feature reduces the risk of accidental opening. When loaded, ISC Klick-lock Buckles cannot be opened by hand (even when both release buttons are depressed).

ISC Klick-lock Buckles are tested without webbing, in a straight line (direct pull), in line with the ANSI Z359.1 Standard. This method gives an accurate, genuine measure of strength.

Overall Width	58mm (2 1/4")
Height (when assembled)	80mm (3")
Thickness	15mm (5/8")
Weight	120g (4.23oz)
Webbing Width on Buckle	45mm (1 3/4")
Webbing Width on Tang	45mm (1 3/4")
Body Material	Aluminium
Tang Material	Plated Carbon Steel
Body Colour	Red or Black Anodised
MBS	16kN (3597lbf)
