Made in Wales, UK

PRODUCT OVERVIEW

The GG301 is a quick & easy portable anchorage solution which can be used in the vertical and horizontal plane. The GG301 is designed for use through hollow-core precast concrete slabs. This anchor is operated by using two fingers to pull back the red collar. This action retracts the retention bar, allowing the device to be inserted into the anchor hole. Once the device is in position, the red collar can be released, causing the retention bar to engage, fixing the device in position.

TECHNICAL INFORMATION

Part Code	GG301
Compatible with Hole ϕ	20-28mm (0.78–1.1")
For use with	Hollow-core Slabs (Concrete)
Maximum Concrete Depth	100mm (4")
Eye Diameter	35mm (1.4")
Overall Dimensions	270 x 65mm (10.3 x 2.5")
MBS	12kN (2697lbf)
Weight	695g (24.5oz)
Material/finishes	Steel Shaft, Plated Steel Eye, with Anodised Aluminium Collar
Standards	EN795:2012
