GRIPPEY |

PRODUCT OVERVIEW

The Grippey Handle Bar is a lightweight, retrofit zip handle device, which is compatible with the ISC Zippey Clip'N'Zip and ZipSpeed Trolley models. During their zip ride, users can hold the handle bars to prevent themselves from rotating, which is particularly useful, as the rider arrives at the landing platform.

Zip handle bars fall outside the regular categories for standard certification and as such, it's not possible to obtain third-party certification for handle bars (since they do not qualify as a 'connector'). The main benefit of the Grippey Handle Bar is that it is completely independent of the connection between the rider's harness and the zip trolley. This means that the rider can be directly connected to the zip trolley, using certified equipment only. The Grippey Handle Bar is present purely as an accessory item and does not interrupt the chain of certified safety components, used to connect the user to the harness.

TECHNICAL INFORMATION

| | |
|--------------------|---|
| Part Code | HAN070/HAN071 |
| Weight | 430g (15oz) |
| Dimensions WxHxD | 260 x 160 x 70mm (10 ^{15/64} " x 6 ^{19/64} " x 2 ^{3/4} ") |
| Material | Aluminium |
| Finish | Anodised |
| Connection | KH204SS HMS Karabiner (Recommended) |
| Lanyard Type | HAN070: for use with Max. 28mm (1 ^{1/8} ") Webbing Lanyard, or HAN071: for use with Max. 13mm (1/2") Rope Lanyard |
| Compatibility | RP074 Zippey, RP075 ZipSpeed, RP076 ZipSpeed |
| Approved Standards | Not Applicable |
