## PRODUCT OVERVIEW

The KT282 Rope Wrench system has been third-party tested and certified by a Notified Body, to PPE 'Regulation 2016/425', allowing users to climb in compliance with the latest European best practice regulations. The PPE Regulations Certification applies to full kits, when used in their entirety.

The Squirrel Tether is specifically designed for use with the ISC Rope Wrench. As the Squirrel Tether is manufactured from Aluminium, it ensures that the system remains free from twist and flex. This means that the Rope Wrench remains in the optimal low friction position during ascent, allowing the climber to achieve maximum climb efficiency. The Squirrel can be used with an SRS Chest Harness, for hands-free tending of the system, while ascending.

## KIT CONTENTS

### Hardware

Rope Wrench  
Squirrel Aluminium Tether, with Squirrel Pulley  
Aluminium HMS Karabiner, with Supersafe Tri-lock gate

### Cord

Teufelberger 85cm e2e Hitch cord  $\varnothing$ 10mm

### Rope Options

Part Code	Rope Type	Termination	Rope Length
KT282A3-A3-C-045	Teufelberger Xstatic, $\varnothing$ 11.7mm	Sewn	45m (147')
KT282A3-A3-C-060	Teufelberger Xstatic, $\varnothing$ 11.7mm	Sewn	60m (196')
KT282A3-A3-C-070	Teufelberger Xstatic, $\varnothing$ 11.7mm	Sewn	70m (229')
KT282A3-A3-C-100	Teufelberger Xstatic, $\varnothing$ 11.7mm	Sewn	100m (328')

Individual kit components can be purchased separately, for use as spare/replacement parts. Kits are supplied disassembled. Teufelberger Xstatic Rope is available with sewn terminations only.

## STANDARDS

Certified to CE PPE Regulation 2016/426 (when assembled and used as a complete kit of ISC-specified parts, with the hitch tied in a Distel 5-wrap configuration. Please see User Instruction Manual for further information).
