## PRODUCT OVERVIEW

The SH909 Triple-action Snaphook is fitted with an opening mechanism which requires the gate, second-action keeper and third-action keeper to be engaged sequentially, in order to open the device. This opening sequence helps to reduce the risk of unintentional opening of the gate. The SH909 has a 'keylock' anti-snag nose. The SH909 has a larger than standard 26mm (1") gate opening clearance.
